

COMMUNITY ENVIRONMENTAL MONITORING PLATFORM

EcoWatch

Report Problems. Take Action. Build a Greener Future.

Team Leader: Reet Gupta · Team Member: Shivani Sharma

Made with GAMMA

THE PROBLEM

Environmental issues are reported, but not coordinated

Visible issues

Illegal dumping, water pollution, water wastage, air pollution, and deforestation demand action.

Scattered reports

Unorganized reporting makes issues harder to review and prioritize.

Made with GAMMA

THE PLATFORM IDEA

EcoWatch turns community reports into accountable action

A web-based platform connects citizens, supervisors, and workers through one visible resolution workflow.

Report

Make issue reporting easier for citizens.

Organize

Review, prioritize, and assign each issue.

Account

Track work, verify completion, and build awareness.

Made with GAMMA

ROLE-BASED EXPERIENCES

One platform, four role-based experiences

Citizen

Reports issues with descriptions, photos, and location.

Supervisor

Reviews reports, sets urgency, and assigns workers.

Worker

Handles tasks and submits completion evidence.

Admin

Monitors analytics and oversees the workflow.

Intended platform capabilities, not measured production results.

Made with GAMMA

END-TO-END WORKFLOW

From citizen report to verified resolution

Report

Citizen submits the issue with context and location.

Review

Supervisor checks the report and sets priority.

Assign

A worker receives the task and deadline.

Act

Work begins in the field.

Complete

Worker submits completion evidence.

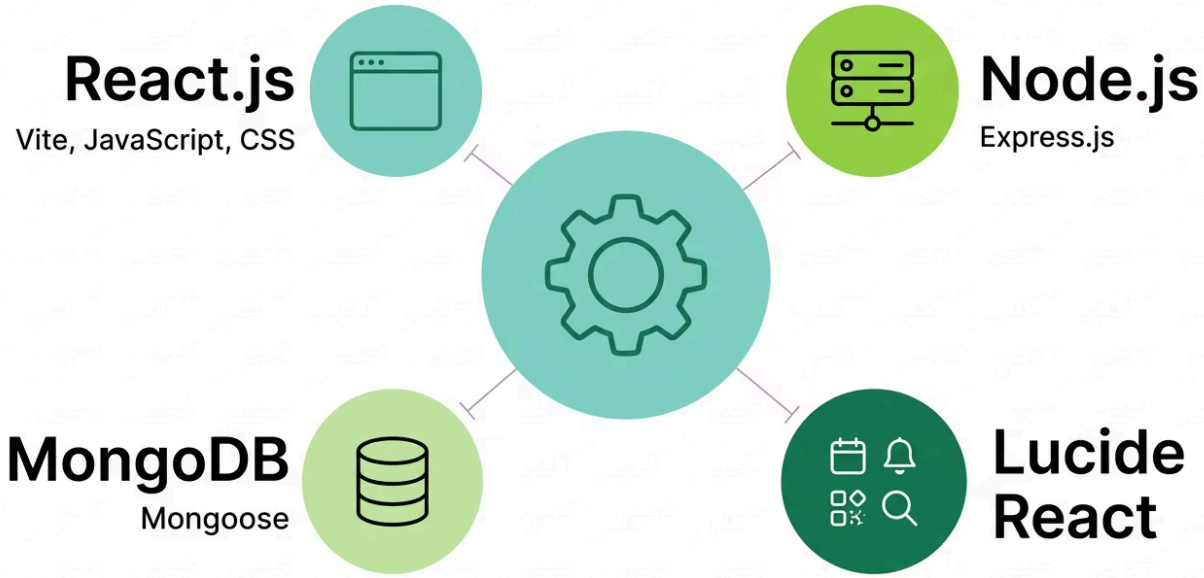

Verify

Resolution is reviewed and closed transparently.

Made with GAMMA

TECHNOLOGY FOUNDATION

The technology stack supports a modular web platform

Made with GAMMA

SYSTEM ARCHITECTURE

Role-based access connects people to the workflow

- **Citizen:** reports and tracks environmental issues.
- **Supervisor:** reviews reports, assigns workers, and monitors progress.
- **Worker:** handles assigned tasks and submits completion evidence.
- **Admin:** oversees the platform and manages the overall workflow.

Different permissions guide each person to the part of the workflow they own.

Made with GAMMA

PROJECT REVIEW

What the team built toward — and what comes next

Team contributions

Reet Gupta
Project coordination, planning,frontend development and task management.

Shivani Sharma
Project implementation, backend integration, and documentation.

Challenges

- Frontend and backend integration.
- Database connectivity and configuration.
- Testing role-based workflows.

Future scope

Planned improvements include interactive maps, real-time notifications, improved analytics, mobile-friendly experience, secure deployment, and enhanced authentication.

Planned, not completed features.

Made with GAMMA

Small Actions. Cleaner Communities. Greener Tomorrow.

-

EcoWatch supports organized environmental reporting, coordinated action, and transparent progress tracking.
